

# SimOptions - 60GB

## 1. Install your eSIM

The QR Code & eSIM profile can only be used once

Follow our detailed installation guide to add your eSIM\*

[Installation Guide for iOS](#)

[Installation Guide for Android](#)

### eSIM Details

SM-DP+ Address:

[consumer.e-sim.global](https://consumer.e-sim.global)

Activation Code:

TN202503101118123933E306

### APN Settings

iOS/Android: "globaldata", "internet" or "kroly"

\* In most eSIM activations, APN settings are configured automatically.

## 2. How to install the eSIM without the QR Code

You can enter the eSIM manually if you are unable to scan QR code. You will be asked to enter the SM-DP+ Address and the Activation Code.

### iOS

1. Go to Settings
2. Tap "Mobile Data" or "Cellular" (depending on the iPhone model)
3. Tap on "Add Cellular Plan"
4. Tap on "Enter Details manually" at the bottom of your screen

### Android

1. Go to Settings
2. Tap "Network & Internet" or "Connections"
3. Tap on the + Icon next to "Mobile Network"
4. Tap "Next" when asked "Don't have a SIM card?"
5. Tap "Enter Code Manually"

## 3. Any more questions?

Contact our customer support if you have questions or encounter any issues installing the eSIM.

Please visit <https://www.simoptions.com/contact-us/> to reach out to us via email or contact us via live chat.

Email: [contact@simoptions.com](mailto:contact@simoptions.com)

\*For successful installation, you must have a stable Wi-Fi connection when activating an eSIM. Installing your eSIM before you travel will not affect its data usage and validity. Your eSIM will only be activated upon arrival at your destination, and the validity begins once you are connected to the local carrier. If the eSIM covers more than one country, it will activate at any of the covered countries
